- Utilize a Bootstrap framework to ensure consistent and visually appealing designs across different pages and components.

EDUCATION

Bachelor of Engineering (B.E) • Sengunthar Engineering College , Namakkal - 2017 - 2021

TECHNICAL SKILLS

- HTML
- CSS
- Bootstrap
- JavaScript
- React.JS
- Redux.JS

PROJECTS

Karactermania

10/2023 - Present

As a frontend developer, I contributed to the development of the KarakterMania website, a platform for a manufacturer and designer of official licensed products. Using HTML, CSS, Bootstrap, JavaScript, React, and Redux, I built a responsive and user-friendly website. Key features included a product catalog, user registration and login system, exclusive collection service for retailers, secure payment and shipping functionalities, and an FAQ section.

Quizzer

01/2023 - 09/2023

Quizzer is a dynamic web application that revolutionizes the way students take exams and organizations conduct quizzes. As the front-end developer for this project, I played a pivotal role in implementing the user interface using HTML, CSS, Bootstrap, JavaScript, React.JS, and Redux. I collaborated with UX/UI designers to create responsive and visually appealing layouts, leveraging Bootstrap for consistency across devices. By developing reusable React components and managing state with Redux, I ensured a seamless and efficient user experience. I integrated RESTful APIs for smooth data handling, optimized performance through lazy loading and code splitting to maintain high code quality. My contributions were crucial in delivering a user-friendly and reliable application, significantly enhancing the examination and quiz-taking experience for users.
